distributed

SPECIAL NEEDS

The City of Lake Stevens strives to provide accessible opportunities for individuals with disabilities. Please contact Steve Edin, City of Lake Stevens ADA Coordinator, at (425) 377-3227 at least five business days prior to any City meeting or event if any accommodations are needed. For TDD users, please use the state's toll-free relay service,

PLANNING COMMISSION REGULAR MEETING MINUTES
Community/Senior Center
1808 Main Street, Lake Stevens
Wednesday,

CALL TO ORDER: 7:00 pm by Vice Chair Jennifer Davis

MEMBERS PRESENT: Jennifer Davis, Janice Huxford, Mirza Avdic, Gary Petershagen

MEMBERS ABSENT: Linda Hoult, Tom Matlack

STAFF PRESENT: Planning Director Becky Ableman, Lead Senior Planner Russ Wright, Clerk Planning and Community Development Jill Meis

OTHERS PRESENT:

Excused absence. Commissioner Huxford made a motion to excuse Commissioners Hoult and Matlack. Commissioner Avdic 2nd, motion carried 4-0-0-2.

Guest business. None

Special Presentation. None

Approve Minutes. Commissioner Avdic made a motion to approve minutes dated 04.01.15. Commissioner Huxford 2nd, motion carried 4-0-0-2.

Action Items. Appointment of primary Design Review Board Liaison. Commissioner Huxford nominated Vice Chair Davis. Commissioner Avdic 2nd, motion carried 4-0-0-2.

Discussion Items. Director Ableman introduced the Capital Facilities element of the Comprehensive Plan Update. An overview of the purpose and funding of Capital Facilities was provided. Director Ableman answered questions regarding transportation, shoreline acquisition and various project overviews.

Director Ableman gave a review of goals and policies of the economic development element.

Commissioner Huxford wanted more emphasis on the Business Retention and Expansion section.

Lead Senior Planner Wright proposed a meeting schedule for open house, follow up and public hearing. He asked for input on how to facilitate the meeting and informing the public of the meeting.

Commissioner Reports. Commissioner Avdic attended the Planning Short Course and found it informative.

Planning Director's Report. Director Ableman distributed the Park Board work program and displayed the Eagle Scout project.

Adjourn. Commissioner Huxford moved to adjourn at 7:47 p.m., seconded by Commissioner Avdic; motion carried 4-0-0-2.

Tom Matlack, Chair

Jill Meis, Clerk, Planning and
Community Development

Staff Report City of Lake Stevens Planning Commission

2015 Comprehensive Plan
Date: May 29, 2015

Subject: Community Open House Review

Contact Person/Department: Russ Wright, Lead Senior Planner and Rebecca Ableman, Planning & Community Development Director

SUMMARY: Community Open House to discuss updates to the 2035 Comprehensive Plan.

DISCUSSION:

The Planning Commission will host its second Public Open House to discuss progress on the 2035 Comprehensive Plan Update. At the Open House staff will provide an overview of the Growth Management Act, Planning Process, and significant changes to the Comprehensive Plan. Many of these items are defined in the Executive Summary attached for your review. After the presentation, the Planning Commission will lead roundtable discussions with the public related to the various plan elements (Environment, Land Use, Housing, Parks and Recreation, Public Services and Utilities, Capital Facilities and Economic Development). Topics for discussion may include survey/opinion results from prior public outreach, new vision statements and proposed goals and policies. Feedback will help staff finalize the updates before submitting a complete draft of the 2035 Comprehensive Plan to the Department of Commerce and Puget Sound Regional Council.

ATTACHMENTS:

- A. City of Lake Stevens 2035 Comprehensive Plan Executive Summary.

City of Lake Stevens 2035 Comprehensive Plan

Executive Summary

2035 LAKE STEVENS VISION

As the city contemplates the next 20 years, it must embrace its position as a unified growing city. Lake Stevens will be a vibrant sustainable community that provides a positive development atmosphere and maintains a strong community image with excellent schools and neighborhoods. Sustainability will be manifested through environmental protection, conscientious community development and sound economic policy. The city will continue emphasizing the role of local growth centers and subarea planning as the primary locations for new development – specifically as essential pockets for economic development and focal points for new neighborhood and commercial areas. The city will ensure that the city’s infrastructure and public services will meet the demands of the community as it grows in an economically feasible manner. Development will be sensitive to the lake, environment and existing neighborhoods. The community will become a balanced community with sufficient and affordable housing, family-wage jobs and a variety of shopping and service options to meet the needs of Lake Stevens’ residents.

PLANNING CONTEXT

Effective land use planning has become a common feature in statewide, regional and local governance since 1991 when the Washington State Legislature enacted the Growth Management Act (GMA) as Chapter 36.70A of the Revised Code of Washington (RCW). The primary purpose of the GMA is to encourage appropriate levels of growth in urban and rural areas consistently across the state. The GMA identifies several mandatory planning elements that jurisdictions must incorporate into their individual comprehensive plans.

- | | |
|-----------------------|-----------------------------|
| 1. Land Use | 5. Rural Element (counties) |
| 2. Housing | 6. Transportation |
| 3. Capital Facilities | 7. Economic Development |
| 4. Utilities | 8. Park and Recreation |

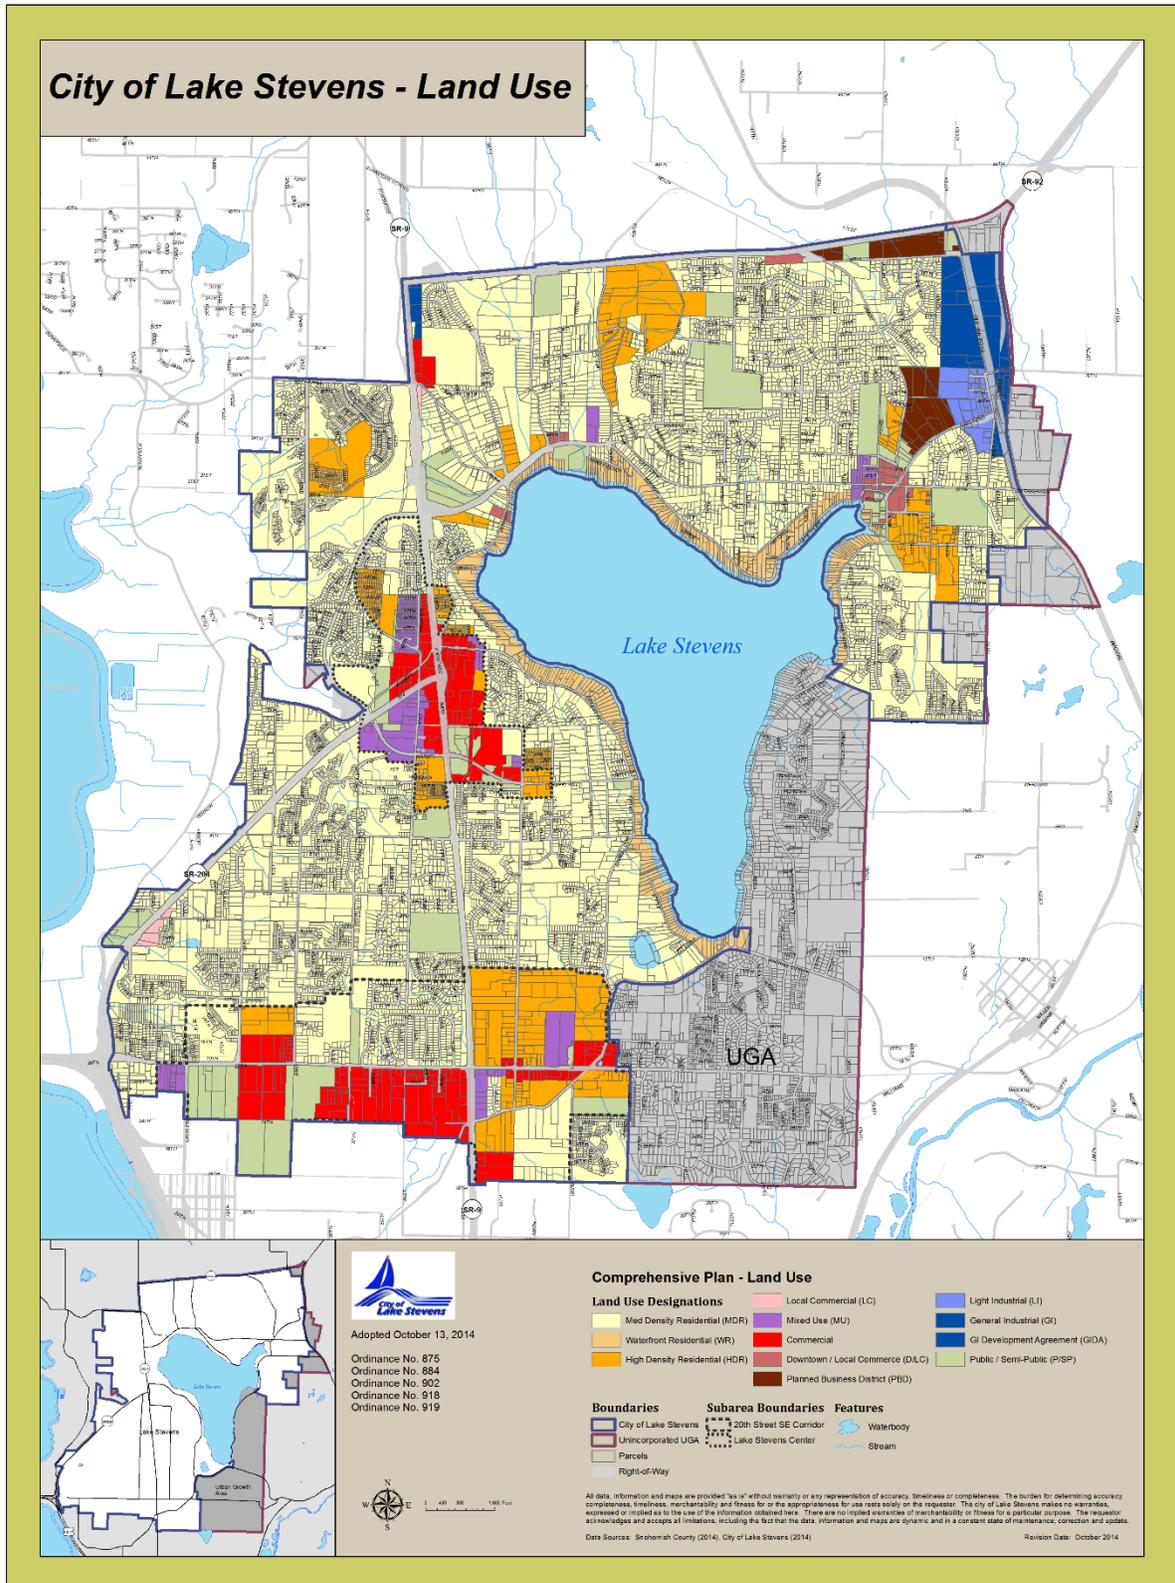

DRAFT 5-28-15

The GMA also directs local jurisdictions to consider specific planning goals to facilitate population and employment growth when developing land use policy and regulations.

1. Promote urban growth in areas where urban services are available.
2. Reduce urban sprawl.
3. Encourage efficient multi-modal transportation systems.
4. Encourage the availability of affordable housing to all economic segments of the population.
5. Encourage economic development.
6. Assure private property is not taken for public use without just compensation.
7. Encourage predictable and timely permit processing.
8. Maintain and enhance natural resource-based industries.
9. Encourage retention of open space and development of recreational opportunities.
10. Protect the environment and enhance the State's quality of life.
11. Encourage the participation of citizens in the planning process.
12. Ensure adequate public facilities and services necessary to support development.
13. Identify and preserve lands and sites of historic and archaeological significance.
14. Implement the Shoreline Management Act as set forth in RCW 36.70A.020.

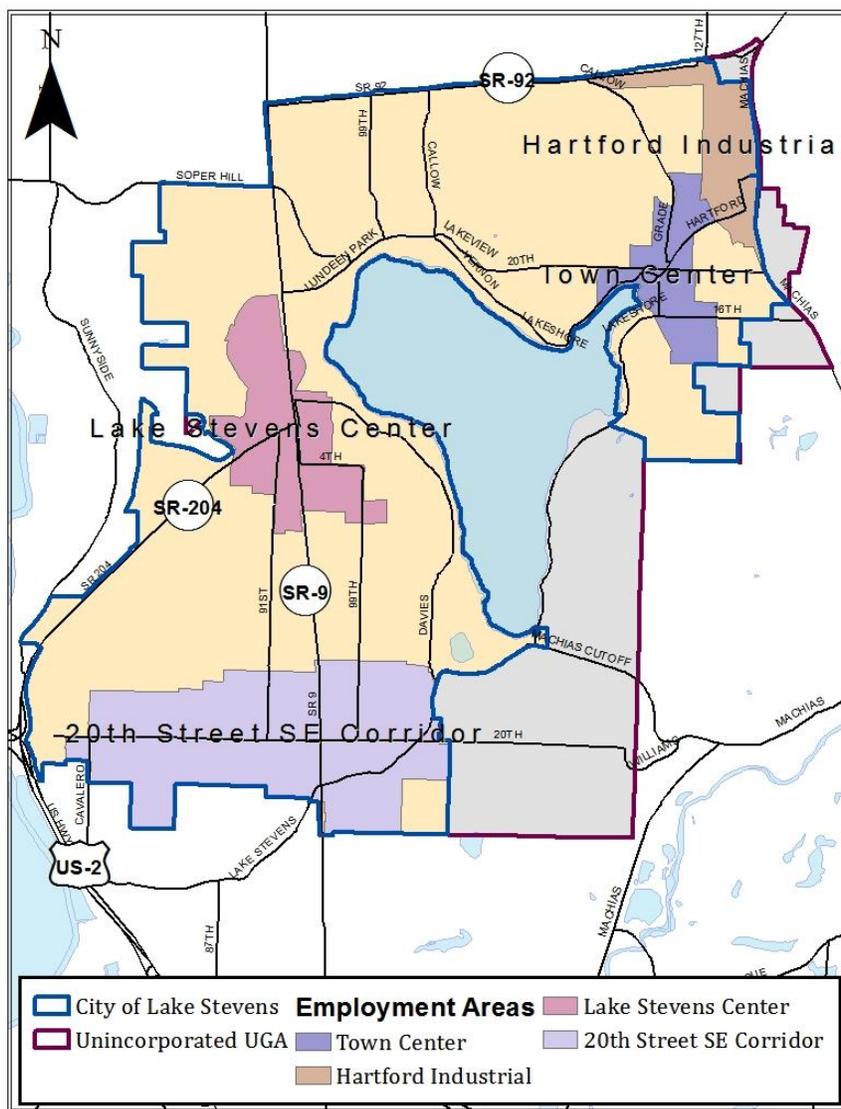

The Puget Sound Regional Council (PSRC) comprised of agencies from the four-county central Puget Sound developed a regional approach, articulated in *VISION 2040*, to implement GMA requirements. *VISION 2040* augments GMA goals related to environmental protection, focused development patterns, housing affordability, sustainable regional economy, integrated transportation systems and adequate public services. *VISION 2040* emphasizes regional growth centers as areas to concentrate future employment and population growth, linking regional and local centers with efficient multi-modal transportation system, promoting sustainability in decision-making and allocating population and employment growth within regional geographies based on community size.

The GMA requires counties to adopt countywide planning policies in cooperation with affected cities (RCW36.70A.210). Countywide planning policies provide a local planning framework to ensure consistency among cities and a regional vision. Snohomish County facilitates collaborative countywide planning through Snohomish County Tomorrow (SCT), which is comprised of staff, local citizens and elected officials from every jurisdiction. The cities, towns, tribes and county have worked together through SCT since 1989 to address local planning issues. SCT provides a forum in which jurisdictions can address regional growth management issues such as transportation, utilities, housing, population and employment.

PLANNING IN LAKE STEVENS

The city of Lake Stevens adopted its initial GMA Comprehensive Plan to address growth in the city and its Urban Growth Areas (UGA) in 1994. The first major update to the Lake Stevens Comprehensive Plan occurred in 2006, which highlighted the city's changing status from small community to a growing city. The 2006 plan identified specific growth centers as the focus for the plan and recommended developing subareas plans for each growth centers including the Downtown Lake Stevens, 20th Street SE Corridor (AKA South Lake), Lake Stevens Center (AKA Frontier Village) and the Hartford Road Industrial Area. By the end of 2012 the city had adopted two subareas and was working on a framework for a third. Also as part of the 2006 Comprehensive Plan, the city developed an annexation plan that calls for eventually annexing the remainder of the unincorporated area within its unincorporated UGA. As of December 31, 2009, all of the UGA west and southwest of the lake has been annexed. Only the areas southeast of the lake, small areas east of downtown and one parcel west of Lundeen Parkway remain unincorporated.

DRAFT 5-28-15

Jurisdictions are required to update their comprehensive plans and development regulations periodically to remain compliant with GMA requirements. Through its annual docket cycle, Lake Stevens continues to refine its plan. For example, the city incorporated economic development data and strategies into goals and policies. The city adopted two subarea plans that considered land uses and housing in large portions of the city. The city continues to update its transportation element regularly, which contributed to the completion of new concurrency based impact fee system. The city adopted a revised Park, Recreation and Open Space Element with a new model for determining levels of service. Other minor changes occur as well – typically in the form of citizen initiated land use map changes.

The GMA mandates jurisdictions complete thorough updates to comprehensive plans according to a predetermined schedule. Snohomish County cities, including Lake Stevens, must complete their major updates in 2015.

As the city began its comprehensive plan update process for 2015 staff identified several tasks that would need to take place to ensure compliance with GMA, PSRC and countywide policies. To date, staff has prepared a self-audit of its comprehensive plan and development regulations to identify any state, regional or countywide inconsistencies. The city has engaged the community in a public participation program that has included public open houses, surveys, social media, outreach to service groups, and meetings with the Planning Commission and City Council. The plan addresses many technical issues:

1. What has changed since the last time we adopted our comprehensive plan (e.g., boundaries, population and infrastructure)?
2. How has demand for various land uses changed?
3. What has been implemented?
4. Are we using all of our planning tools (e.g., subarea planning, innovative codes, continuous public participation, etc.)
5. Does the comprehensive plan accurately reflect the city's community vision?

Aside from meeting technical and procedural requirements the update has allowed city staff to pose fundamental questions to the community about their vision for Lake Stevens over the next 5, 10 and 20 years.

- Will you be in Lake Stevens in 2035?
- Where will you live?
- Where will you work?
- How will you get there?
- What will you do for recreation?
- Where will you shop?

At the first open house, city staff and board members had breakout sessions with the public to discuss the mandatory comprehensive plan elements. Based on the public comments received, fresh vision statements emerged for each plan element. The next important avenue to receive public outreach was an opinion survey. The survey was posted electronically on the city's website and administered at city events. Through this survey, community members were asked a series of questions to determine public concerns and preferences for growth over the next 20 years.

DRAFT 5-28-15

- 88 % of participants live in the city with approximately 33% live in SW Lake Stevens;
- Cottage housing and townhouses are the most popular non-single-family housing options;
- When asked where residential growth should go, the preference was first for southwest Lake Stevens followed by Northeast Lake Stevens and the Soper Hill area;
- 70% of participants do not work in Lake Stevens of those who do 38% work in the Town Center;
- Retail, High-tech industry and professional offices were identified as the most important employment sectors for Lake Stevens;
- Participants believe new employment should be concentrated in the 20th Street SE Corridor, followed by Lake Stevens Center and the Hartford Industrial Area – all areas are defined growth centers;
- Participants indicated an increased sense of community and residential opportunities were the most positive changes over the last 10 years, while increased traffic was identified as the greatest challenge
- Participants identified schools and neighborhoods (both approximately 37%) as the city's greatest strength;
- Approximately 30% of participants are attracted to other cities for shopping and dining;
- 25% of participants felt economic development should be a priority, followed by public services over the next 20 years;
- As a follow up, respondents stated shopping and jobs could improve over the next 20 years;
- Over 38% of participants identified adding more sidewalks and pedestrian paths as the most important transportation improvement followed by increased vehicle capacity; and
- 37% of participants indicated parks and open spaces are the most important public facilities followed closely by roads and sidewalks.

These responses provided a valuable framework for re-evaluating individual plan elements and updating goals and policies to reflect community preferences.

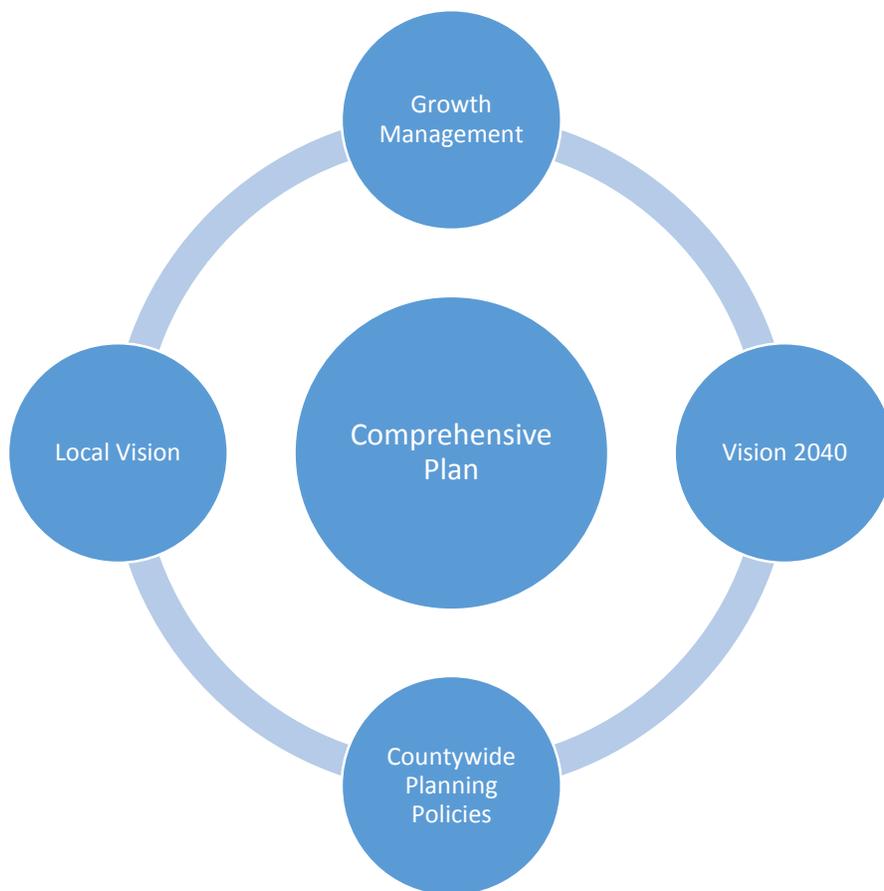

The 2035 Lake Stevens Comprehensive Plan update addresses the applicable GMA elements as specific chapters and considers optional elements related to conservation, solar energy, recreation and subarea plans in individual chapters. The plan incorporates and responds to community preferences and concerns. It also considers the role of regional planning under Vision 2040 and countywide planning in the development of specific goals and policies. The following sections will identify the vision and primary revisions for each element.

Introduction

A Vision for Planning – the city will integrate the Growth Management Act (GMA), defined in Chapter 36.70A of the Revised Code of Washington (RCW), as an essential planning framework for the Lake Stevens Comprehensive Plan. The GMA principles will help direct community, regional, and statewide efforts to enhance the quality of life, environmental protection and economic vitality for the city, its residents and its interests in and around the Lake Stevens Urban Growth Area and Rural Transition Area as a unique lakeside community.

The Introduction describes the planning context for the Growth Management Act, PSRC Vision 2040 and Snohomish County as these relate to coordinated local planning; it provides a basic description

of the planning area including the UGA and Rural Transition Area (RUTA); and describe the city's vision statement and individual element visions. This chapter will also describes the public process and environmental review for this update and contains revised goals and policies for administering the annual Comprehensive Plan process.

Environment and Natural Resources

A Vision for the Environment and Natural Resources – the city of Lake Stevens will provide effective and ongoing investment to ensure water quality and continued environmental stewardship for current and future generations by protecting fish and wildlife habitat, critical areas and open space corridors; conserving land, air, water and energy resources; and integrating the shoreline management of Lake Stevens into land use decisions.

The city is committed to providing ongoing environmental stewardship of our shared shorelines, open spaces, critical areas, and wildlife habitats. Updates to the Environment and Natural Resources chapter of the Comprehensive Plan describes the integration of the state, regional, county and local planning context; provides a description of local geology, soil profiles, drainage, and surface and ground water resources; discusses the city's coordination with other state and regional agencies to improve air quality and mitigate the effects of climate change by encouraging sustainable development; and consolidating and re-organizing the Goals and Policies section to eliminate redundancy, contradictory policies, and reflect updated code requirements. Staff has

DRAFT 5-28-15

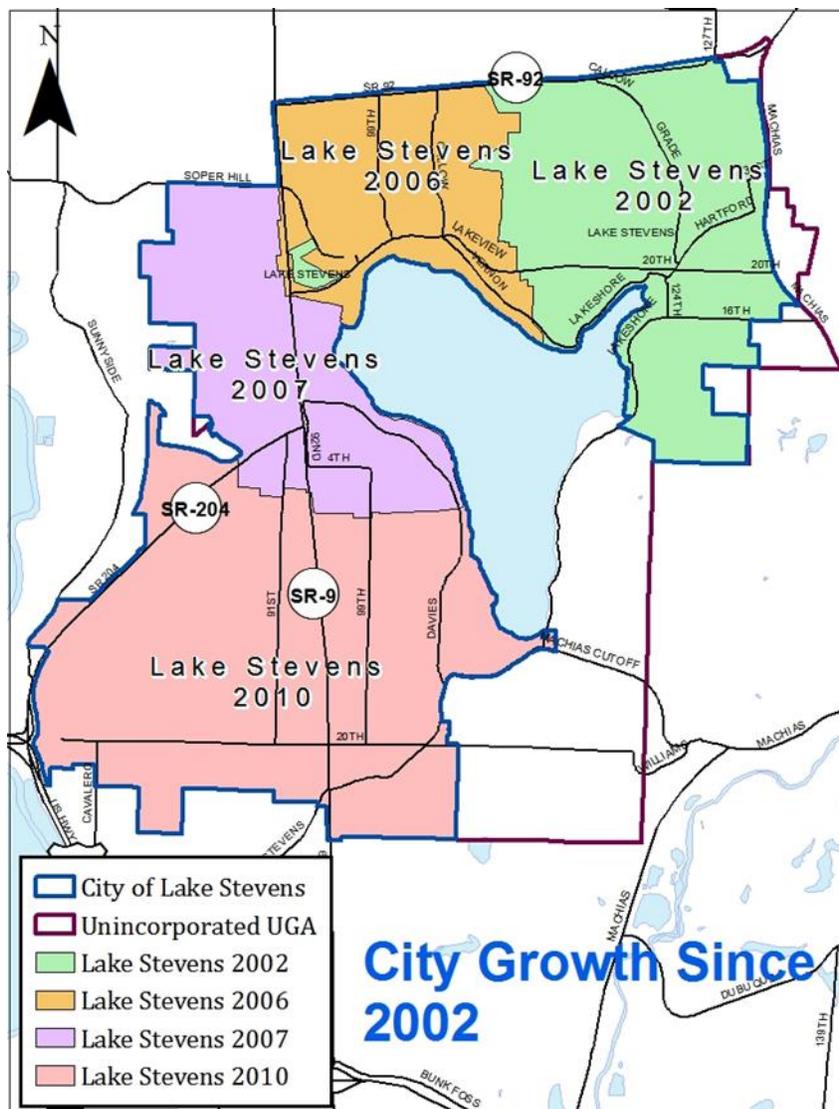

also added a discussion about critical aquifer recharge areas within the city and transfers of development rights (TDR's).

Land Use Element

***A Vision for Land Use** – As Lake Stevens continues to grow in population and area, the city will strive to create balanced opportunities for residential growth, varied housing types, employment, commercial endeavors and public services for all people to live, work, learn and play throughout the community.*

The city's Land Use Element considers anticipated land use forecasts and growth targets for the next 20 years. The largest single change to the Land Use Element is accounting for areas annexed into the city since 2006. Through a series of annexations the city population grew from 6,361 to 26,670 in 2010. The current city boundaries encompass an area of approximately 5,760 acres (8.9 square miles). Small pockets of unincorporated areas comprise the remainder of the Lake Stevens Urban Growth Area (UGA) with an area of 2,192 acres (3.4 square miles) including the lake.

Major changes to the Land Use Element include an enhanced discussion of state, regional and countywide planning policies, updated statistical data and analysis along with revised goals and policies. This section includes significant updates to the building lands data between 2007 and 2012. The *2012 Buildable Lands Report (BLR)* and the *Snohomish County Growth Monitoring Report* set the tone for evaluating the Land Use Element. Significant land use trends are highlighted below.

- The *Snohomish County Growth Monitoring Report* indicates the Lake Stevens population grew by over 341% between 2000 and 2010.
 - Since 2010, the city population has grown annually by approximately 4%.
- The BLR estimates the 2011 Lake Stevens Urban Growth Area (UGA) population to be 33,218.
 - The 2014 city population is 29,170.
- The BLR estimates the 2035 UGA population will be 46,634.
 - The city’s portion would be 39,340 or an increase of 11,130 people by 2035.

DRAFT 5-28-15

- There will be estimated 509 person surplus.
- The BLR estimates the 2035 UGA employment capacity to be 7,988.
 - The current employment target for the city is 7,412 or an increase of 3,818 jobs by 2035.
 - There will be 1,373 job surplus in 2035.

Through a review of recent permit data, remaining buildable land supply has been identified for employment and population growth based on growth from mid-2012 to present.

- Remaining buildable acreage is estimated to be 161 acres for commercial development (218 for the entire UGA) and 716 acres for residential development (1,212 for the entire UGA).
- Based on the previous buildable acres the city housing capacity is 3,784 new units (5,465 for the entire UGA) and employment capacity is 1,954 new jobs (2,410 for the entire UGA).

At the present rate of development the city remains on track to meet growth targets.

The Land Use Element provides updates to the city's growth center strategy with discussions of progress and next steps. The city's ultimate goal for each center, based on the economic and demographic assessments, is to develop a unique subarea plan with distinguishing characteristics that serve slightly different markets ensuring economic diversity and vitality. As noted the city adopted subarea plans for the Lake Stevens Center and 20th Street SE Corridor in 2012. The city has developed a framework plan for Downtown Lake Stevens, which will transform into a subarea plan.

In addition, this chapter continues to emphasize the city's interest in coordinated planning of transitional areas including unincorporated portions of the UGA and RUTA where future annexations and development will occur over the next 20 years. The city will annex the remaining unincorporated UGA throughout the 2035 planning horizon. Additionally, the city of Lake Stevens remains interested in development outside its borders given the impact that felt on the entire Lake Stevens community in preparation for future UGA expansions following build out.

Housing Element

A Vision for Housing –The city will provide a regulatory framework that supports the creation of high-quality housing (e.g., single-family houses, townhomes and apartments) with a range of densities, which implement community design preferences and are affordable to all community members across the city.

The Housing Element includes updated statistical and demographic information based on the *2013 Housing Characteristics and Needs in Snohomish County Report*, prepared by the Planning Advisory Committee of Snohomish County Tomorrow and the *Affordable Housing Profile* for the city of Lake Stevens, prepared by the Alliance for Housing Affordability. This information is used to describe current population and housing trends in the city. Specific attention is given to discussion of housing distribution, household makeup and affordability. City information is compared to trends in Snohomish County and the other larger cities in the county. Significant population and housing trends are highlighted below.

DRAFT 5-28-15

- Since 2000, larger cities manifest the greatest population growth in Snohomish County, with Lake Stevens experiencing one the highest population increases since the last census.
 - The current city population of 29,170 represents an increase of 350% over the 2000 population, which was 6,361.
- Lake Stevens has the youngest median age at 32.1, while the median age in Snohomish County is 37.3.
- About 7% (1,951 people) of the Lake Stevens population is over 65 which is projected to increase over the next decade.
- There are currently 9,550 households in the city – approximately 74% of those are family households.
 - The combined, average household size in Lake Stevens is 2.87 persons, while the average county household size is 2.61 persons.
- In 2012, there were an estimated 10,414 dwelling units in Lake Stevens and 237,899 dwelling units in Snohomish County.
 - Lake Stevens ranked fourth (80%) for the highest ratio of single-family dwellings in the county.
 - The average house size for new construction between May 2013 and May 2015 was just under 2,400 square feet.

DRAFT 5-28-15

- The 2011 area median income (AMI) in Lake Stevens is \$73,000, which is slightly higher than the AMI for other larger cities at \$72,000 and Snohomish County, which is nearly \$68,000.
 - Approximately 47% of the occupied housing units in the Lake Stevens and Snohomish County are cost-burdened.
- The 2011 unemployment rate in the city was 5.5% compared to 5.7% for the county.
- The 2013 median home price in Lake Stevens is \$246,900.
 - Owner occupancy increased from 75% in 2000 to 78.2% in 2010.
- The average monthly rent in 2000 was \$716 while in 2010 the average monthly rent increased to \$1,254
 - Rental unit vacancy increased from 5.4% in 2001 to 9.1% in 2010.
- In 2011 the special needs population within the county was over 110,000.
 - 43,600 residing in the unincorporated areas
 - 32,000 in larger cities
 - 3,009 in Lake Stevens
- In Lake Stevens, approximately 3% of households received some sort of assistance; while in Snohomish County 3.8% of households received assistance.
- 97,000 additional housing units would need to be constructed in the county by 2035
 - Larger and small cities have about 60% of the available residential capacity for single-family and 40% for multifamily.
 - Lake Stevens needs to accommodate an additional 4,469 housing units.
 - The projected city share of affordable units would be 984 affordable housing units for households making less than 50% of AMI.

Other changes to this section include an updated discussion of state, regional and countywide planning policies, updated strategies to promote housing affordability along with updated goals and policies.

Public Utilities and Services Element

A Vision for Public Utilities and Services – Lake Stevens will strive to provide excellent public utilities & services to meet the health and safety needs of the community in proportion to future population growth and will continue to coordinate with local service providers such as the Lake Steven Sewer District, Lake Stevens Fire, and the Lake Stevens School District to ensure service continuity as the community grows.

This element provides a descriptive inventory of and considers the general location and capacity of all existing and proposed public utilities, facilities and services in the city of Lake Stevens in relation to levels of service for current and future residents and businesses. In the preparation of this element, city staff met with other departments, public agencies and special purpose districts (e.g.,

DRAFT 5-28-15

Lake Stevens School District, the Snohomish County Public Utilities District (PUD), Lake Stevens Sewer District, Lake Stevens Fire District and Lake Stevens Police Department) to identify the current status of facilities and services provided by these agencies to incorporate. Significant trends are highlighted below.

- The Lake Stevens Police Department continues to provide a variety of services including marine and road patrol, crime and accident investigation, traffic enforcement, crime prevention, School Resource Officer Program, concealed weapons permits, passports, records and evidence keeping, and animal control.
- Within the city's stormwater system there are approximately 68 city-owned or operated facilities, 4,562 catch basins, 13.5 miles of roads side ditches, 66.2 miles of pipe and 22,942 feet of culverts
- The sewer system includes a network of trunk and collector lines, a flow telemetry system, manholes, and pump/lift stations and a treatment plant operated by the Lake Stevens Sewer District.
 - Since the last update the new Sunnyside Treatment Plant and Southwest Interceptor have been completed providing additional capacity for development.
 - The Sewer District will complete an update to their Sanitary Sewer Comprehensive Plan in 2015
- Lake Stevens Fire serves an area of about 46 square miles with 3 stations and 1 administration building.
 - The Fire District performs fire code compliance activities, inspects commercial and public buildings for the city of Lake Stevens (381 in 2013) and reviews land use and building permits through the Fire Marshal's office.
 - In 2013, the Lake Stevens Fire responded to 4,659 calls.
 - Over the past 5 years, the Fire District has experienced an annual increase in call volume of 1.5%.
 - The Fire District plans to increase the daily staffing level to 14 firefighters by year 2017 and build a new station by 2022.
- The Lake Stevens School District covers approximately 37 square miles
 - The School District operates 6 elementary schools, 2 middle schools, 1 mid-high school, 1 high school along with an alternative programs.
 - Between October 2008 and October 2013, student enrollment increased by 7%.
 - The School District anticipates that the populations within its boundary will grow to 61,000 by 2035.
 - The city has adopted the most recent School District Capital Facilities Plan.
- The city coordinates with the Snohomish County Health District for public health services, specifically the review of septic systems and food service inspections
- Waste Management Northwest, Incorporated and Republic Services provide solid waste services within the city under contract for a 3-year period.

DRAFT 5-28-15

- Puget Sound Energy provides natural gas service through a city franchise.
- The Public Utility District No. 1 of Snohomish County (PUD), serves the city of Lake Stevens
 - 80% of its power from the Bonneville Power Administration, with remainder provided from a mix of renewable resources.
 - The PUD operates 3 distribution substation with the city and multiple transmission lines.
- The PUD also manages the city’s water system, which includes 8 reservoirs and 330 miles of pipe.
 - The primary water supply to the Lake Stevens Water System comes from Spada Lake, purchased from the city of Everett.
 - Former emergency wells, in the northeast corner of the city, have been converted to full-time use to supplement the water supply.

Parks Element

A Vision for Parks and Recreation – the city of Lake Stevens will create diverse recreational opportunities for all ages to enjoy parks, trails and activities and local events throughout the community and with expanded access to Lake Stevens.

Only minor changes are proposed to the Parks Element including an updated vision statement and updated references in the capital projects list to include a discussion of the Cavelaro Park Master Plan, Frontier Heights Park and Trail Connections as major update was completed in 2013.

Transportation

A Vision for Transportation – the city will develop an effective multimodal transportation system that emphasizes access, direct circulation and safety for vehicles, freight, public transportation, cyclists and pedestrians locally and to the region.

The Transportation Element contains updated information related to the road classifications, level of service standards, street inventory, multi-modal planning, and mass transit. The chapter includes required GMA, PSRC and county required goals and policies. Analysis of future roadway, safety, and pedestrian and bicycle needs have also been reviewed and updated. The goals and policies have been revised as needed to ensure required elements are included for consistency with other plan elements.

Economic Development

A Vision for Economic Development – Lake Stevens will support a sustainable local economy by supporting a varied job sector for residents, promoting excellent shopping and service options, providing a stable and predictable permitting process and fostering accountable government oversight of public funds.

DRAFT 5-28-15

Changes to the Economic Development Element include updated goals and policies to reflect the City's focus, efforts and progress towards the economic strategy plan adopted by the City in 2010. Updates also include market and demographic data used as economic indicators that will guide further emphasis on specific strategies supporting economic growth in the areas of job sector diversification, retail and personal services industry growth to serve the community's needs. This data is ever changing and will be used as a "snap shot" in time. Therefore the Chapter further provides for updating, monitoring data and analyzing results as an on-going activity to ensure City resources are used for the best possible yield and in a responsible manner. The changes are supported in the Land Use Element and other Comprehensive Plan elements by directing retail and employment growth in into the City's Growth Centers.

Capital Facilities

A Vision for Capital Facilities – the city will develop a realistic and achievable capital facilities plan that ensures an effective use of taxpayer and ratepayer dollars that prioritizes capital investments to maintain adopted levels of service; responds to project urgency and feasibility; and provides a clear community benefit.

The Capital Facilities Element was substantially changed in 2012 and 2013 as a result of the newly adopted Subarea Plans for Lake Stevens Center and 20th Street SE Corridor. The primary modifications to the Capital Facilities Element in 2015 contain updates of financial data, inventory, funding mechanisms, and clarification of the 6-year Capital Improvement Plan. The Goals and Policies are updated to reflect the City's desire to be a sustainable community around the Lake with unsurpassed infrastructure supporting an exceptional quality of life. The City expects to accomplish these goals by ensuring good fiscal stewardship, using smart growth principles to understanding how the City's planned growth pattern affects the investments that will be need and investing in where

DRAFT 5-28-15

new growth should occur. The changes in this Element also provide for the short and long term cost planning to support infrastructure expenditures.
