

# NEWS RELEASE

**February 14, 2020**

**HIGH WATER ADVISORY – NO WAKE** in effect to minimize damage to City, State and private property.

Due to recent weather events the water level of Lake Stevens is extraordinarily high and there is potential for damage to vessels as a result. The City of Lake Stevens is requesting no wake speeds be observed as floating debris, dead heads, logs, dislodged recreational equipment that could include floating docks or parts of overwater structures could be present. Please use caution while operating your vessel on Lake Stevens.
